Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

1 RECORD OF ORAL HEARING
2
3 UNITED STATES PATENT AND TRADEMARK OFFICE
4

5
6 BEFORE THE BOARD OF PATENT APPEALS
7 AND INTERFERENCES
8

9
10 Ex parte BENNETT M. RICHARD
11 and JOHN T. BROOME
12

13
14 Appeal 2008-1084
15 Application 10/695,205
16 Technology Center 3600
17

18
19 Oral Hearing Held: October 23, 2008
20
21

22
23 Before WILLIAM F. PATE, III, JENNIFER D. BAHR, and JOSEPH A.
24 FISCHETTI, Administrative Patent Judges
25

26
27
28 ON BEHALF OF THE APPELLANT:
29

30 STEVEN ROSENBLATT, ESQUIRE
31 Duane Morris, LLP
32 1200 Southwest Freeway, Suite 2150
33 Houston, TX 77027
34

35
36 ALSO PRESENT:
37

38 CHARLES GREENHUT
39 ERIC PICO
40

1 The claim in question -- claim 1 doesn't talk about running the screen
2 that's already fabricated into the hole. It talks about how to make the screen.

3 Echols understands the expansion technology exists for screens, but
4 yet when he discusses his fabrication method his example shown in figure 3
5 is a weld 58. As explained in the application, welding is a bad thing if
6 you're going to expand downhole.

7 The use of screens could cause differential pressures on them if they
8 clog up, could put stresses on the end. Expansion to attach the filter
9 assembly to the base pipe is a more certain way of keeping them together.
10 Once they separate, you don't have any screening action at all.

11 So we went a few rounds during prosecution, which I'm sure you're
12 familiar with, and I could not convince this examiner that there is a
13 difference between a method of making something and a method of using
14 something.

15 A method of using something in a well bore requires you to run the
16 thing into the well bore. Otherwise, the method is useless. There's no
17 running it down the well bore in my claim 1.

18 My claim 1 focuses on how you attach the filter assembly to a base
19 pipe, which is part of the tubular string that goes in the hole. My preamble
20 says that just like Echols' preambles in all his claims says that, too.

21 These claims focus on how to make it, even though he talks about
22 how to run it. I'm trying to claim how to make it.

23 What's novel about this is the attachment is done by expansion,
24 eliminating the welding, eliminating a hazard of failure downhole. That's
25 pretty much it.

26 JUDGE PATE: Do you have any questions?

1 JUDGE FISCHETTI: No.

2 JUDGE PATE: Judge Bahr?

3 JUDGE BAHR: I don't think so.

4 JUDGE PATE: We have no questions. We're going to take this case
5 under advisement.

6 MR. ROSENBLATT: Thank you, sir.

7 JUDGE PATE: Thank you for your brief.

8 (Whereupon, the proceedings at 9:09 a.m. were concluded.)
